What is this product?

Type

■ This product is a class of units of the Sub-Fund and is denominated in EUR. The Fund is an open-ended undertaking for collective investment (*Fonds Commun de Placement* or "FCP") and qualifies as an Undertaking for Collective Investment in Transferable Securities ("UCITS"), subject to Part I of the Luxembourg law of 17 December 2010 relating to Undertakings for Collective Investment ("Investment Fund Law"), transposing Directive 2009/65/EC related to UCITS.

■ As an investment fund, the return of the Sub-Fund depends on the performance of its underlying assets.

Objectives

Investment objective:

■ The objective of the Sub-Fund is to achieve capital appreciation by investing mainly in a diversified portfolio of mid and long term bonds (including convertible bonds, warrants on transferable securities, zero coupon bonds and treasury bonds with no rating constraint) issued by or guaranteed by national governments or government agencies from non G-7 States (G-7 consists of Canada, France, Germany, United States, United Kingdom, Italy and Japan), dealt on regulated markets which operate regularly and are recognised and open to the public.

Investment policy:

■ The Sub-Fund is actively managed in reference to the benchmarks 80% J.P. Morgan EMBI Global Diversified (EUR hedged) and 20% J.P. Morgan EMBI Global Diversified Composite (EUR unhedged) (the "Benchmarks"). For the construction of the portfolio, the Benchmarks serve as reference in terms of overall exposure to risk factors including country, interest rate, credit and currency position. Amplitude of deviations from the Benchmarks vary depending on the degree of conviction of the investment manager.

■ Emphasis is placed on bonds issued in the following currencies: Euro, Japanese Yen, Pound Sterling, US Dollar. Financial techniques and instruments for hedging and/or non hedging purposes may be used.

■ Given the above investment objective and policy and the risk and reward profile of the product, the recommended holding period is 3 years.

Subscription and Redemption: Investors can buy or sell units of the Sub-Fund every day which is a bank business day in Luxembourg ("Business Day").

Distribution Policy: The Sub-Fund aims to pay out a dividend on a semi-annual basis.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we, as the management company acting on behalf of the Fund, are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of the Sub-Fund to pay you.

This product is in this category because it invests in a range of assets with different levels of risk and its simulated and/or realised return has experienced a medium-low level rises and falls historically.

Not all risks affecting the Sub-Fund are adequately captured by the summary risk indicator.

This rating does not take into account other risk factors which should be considered before investing, these include: emerging market risk, liquidity risk, financial, economic and political risk, credit risk, currency risk, use of derivative instruments, high yield bonds risk, operational risk, interest rate risk and holding of convertible bonds.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we, as the management company acting on behalf of the fund, are not able to pay you what is owed, you could lose your entire investment.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the "Risk factors" section of the Fund's prospectus, available free of charge at www.neam.lu/lu/documents.
